

METHACRYLATE (PMMA)

Methacrylate (PMMA), commonly called Plexiglas, is a thermoplastic material, similar to glass; it is rigid, transparent or opaline, it has a good resistance to chemical agents. PMMA sheets can be cut, perforated, milled, folded, glued, etc... All sheets are protected by a polyethylene film on both sides.

Applications: Methacrylate (PMMA) sheets are used in these fields: signage, lighted signs, plates, panels, exhibitors and interior decoration, skylights...

RANGE AT STOCK			
Article code	Article description	Thickness (mm)	Size (mm)
028NLMO03	OPALINE PMMA	3	3050 x 2050
028NLMO04		4	
028NLMT02	TRANSPARENT PMMA	2	3050 x 2050
028NLMT03		3	
028NLMT04		4	
028NLMT05		5	
028NLMT10		10
