

MAGNET

Permanent flexible **Magnet** is made mixing iron powder with synthetic rubber or plastics (CPE or NBR) with Strontium ferrite (Sr0.6Fe2O3). This material has long-lasting magnetic properties, it is flexible and extremely easy to be processed: it can be cut, die cut, perforated, printed (silk-screen and offset printing) and, obviously, glued.

Applications: Advertising plates for vehicles, exhibition equipment, toys, gadgets, etc. It offers constructors and designers an open space, where they can express their creativity.
