

# PET STEEL & NATURAL MAGNET

PET STEEL is a flexible and printable magnetic receptive material.

**Applications:** PET STEEL is applied to both flat and curved surfaces, for indoor and outdoor applications such as:

- POP displays, commercial signage in chain store, super market, shops, restaurant...
- Business wall...
- Removable and changeable advertisements in subway, railway station, business center...
- Map guide in exhibition center, road side...

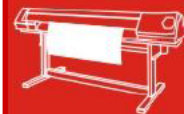

Why better than traditional POP Materials?

It is easy and fast to install and change.

It is easy to transport even if in big size because it can be rolled up.

It can be high-precision printed on digital, UV and inkjet printers, both with eco-solvent and solvent ink.

Good holding power and stability.

It is not adhesive, so it can be perfectly spread without bubbles and it is easily removable and reusable.

The back support for **PET STEEL** is made by the **NATURAL MAGNET**:

it can be applied directly on walls, pillars and panels, whether with glues or using the adhesive type.

### RANGE AT STOCK: **PET STEEL**
