

POLYESTER FILM

Polyester Film is a textured and thermal stabilized product, available with MATT or GLOSSY finishing. It is treated for silk-screen printing and the article glossy/matt (thickness 200 my) is also suitable for **UV digital printing**. Polyester Film is flexible and the surface coating guarantees a very good resistance against abrasions and chemical agents.

Applications: Polyester Film is very good to realize membrane switches, frontal MTS panels, labels, plates, isolating supports and much more.
