

COMPACT POLYPROPYLENE

Compact Polypropylene is available in the form of sheets and constitutes a valid alternative to PVC for the graphic industry and for the manufacture of paper and cardboard articles. The main characteristics of this product are: low price compared to PVC, high workability, resistance to shocks, traction, bending, flattening, contact with acids, bases and aqueous solutions of inorganic salts. Compact Polypropylene can be printed, die-cut, welded, glued; furthermore, it can be washed, sterilised and recycled.

Applications: Bases for advertising signs, labels, tags, packing, various objects, toys, etc.
